Projects

Enterprise-Grade E-commerce + ERP System
MongoDB, Express.js, React.js, Node.js

- Designed and implemented a full-stack enterprise e-commerce platform integrating ERP modules for inventory, vendor, and order management, enabling streamlined business operations and real-time data synchronization.
- Architected secure RESTful APIs with JWT-based authentication and role-based access control.
- Optimized MongoDB schema design to improve data management and transaction processing efficiency.

MeeSeva Web Portal with Admin Panel
MongoDB, Express.js, React.js, Node.js

- Developed a role-based government service portal supporting dynamic application forms, real-time status tracking, and secure backend processing using MERN stack architecture.
- Engineered modular REST APIs and implemented authentication middleware with structured database models.
- Enhanced data integrity and administrative workflow automation through secure backend integration.

Internship

MERN Stack Developer Intern **Sep 2025 – Dec 2025**
DP World *Dubai, Remote*

- Engineered and deployed dynamic full-stack web applications leveraging the MERN stack (MongoDB, Express.js, React.js, Node.js), ensuring modular architecture and seamless client-server communication.
- Designed and integrated secure REST APIs with JWT-based authentication and role-based authorization mechanisms.
- Implemented middleware validation and structured request handling to ensure data integrity and access control.
- Improved application performance by optimizing MongoDB queries, indexing strategies, and asynchronous backend operations.
- Collaborated within Agile development cycles, participating in sprint planning, code reviews, and deployment workflows.
